HOSPITAL FAIR PRICING PLEDGE An Aspirational, Non-Binding Statement

HOSPITAL NAME

Recognizing the direct link between hospital chargemaster rates and debt for the uninsured, as well as the challenges of identifying all uninsured patients likely to be eligible for financial assistance, **HOSPITAL NAME** intends to:

1. **Consider** updating its financial assistance policy generally;
2. **Consider** using an “uninsured discount” to cap the amount due from uninsured patients or, if one is already in use, steepening that discount; and
3. **Consider** using, or expanding, “presumptive eligibility” techniques aimed at determining patients eligible for financial assistance, even in the absence of completed applications.
